

The professional steamer that is compact yet powerful, built for frequent stripping use.

## Introduction

The LMB Steam Master<sup>®</sup> wallpaper stripper is a professionally rated hard wearing system built for heavy duty usage.

The powerful 2750W element, with the large tough yet lightweight steam plate can penetrate through several layers of wallpaper and Artex<sup>®</sup> at a time, making it ideal for heavy weight on site jobs.

Designed with a unique patented built in step, it provides a strong working platform saving the need for a ladder in hard to reach areas.

The large anodised 7.5 litre water tank with exterior water level indicator allows for up to 90 minutes continuous steam time for larger stripping jobs. Only clean water is needed, so it is a cost effective solution. The steam plate, cable and hose are designed to pack away neatly making it compact and easy to move from job to job.

The LMB Steam Master<sup>®</sup> is a reliable and safe solution with an anti-kink 5 metre hose and comes with a 3 year tank corrosion guarantee. It is the perfect choice for painters or decorators and is ideal for the tool hire or rental market.
